

# PORT ENGINEERING LTD

WELDING & FABRICATION

---

## ENVIRONMENTAL GENERAL POLICY STATEMENT

***Scope: " General engineering, welding, fabrication and installation of structural steel and pipework. "***

Within the constraints of the above scope it is the policy of Port Engineering to:-

- Establish sound environmental performance through the implementation of environmental management systems and training all our staff on company policies, objectives and targets as appropriate
- Meet all relevant legislative, regulatory and environmental codes of practice
- Foster the commitment of all management and staff to continually improving the environmental performance of the company and in their domestic activities
- To ensure that staff consider all environmental aspects and potential impacts of their work and ensure the availability of a platform for discussion and suggestion of environmental concerns and initiatives
- Develop objectives that target environmental improvements and monitor performance by regular review
- Develop a relationship, and encourage suppliers and contractors to recognise their environmental responsibilities and make it part of the way we do business together
- Consider environmental issues within the organisations strategic decision making process
- Cooperate with the communities in which we operate, government, regulatory bodies and interested parties with the shared vision of being a good and trusted neighbour
- Promoting waste minimization by recycling and /or finding other uses for redundant and waste product whenever economically viable and environmentally sound to do so.

The requirements of this policy will be achieved by working in accordance with the requirements of ISO 14001: 2004 Environmental Management Systems.
