

PORT ENGINEERING LTD

WELDING & FABRICATION

QUALITY POLICY STATEMENT

The Company's business scope is the welding, fabrication and installation of structural steel and pipework. The business is built on the solid foundations of extensive experience and training.

The Company aims to develop and maintain an effective and efficient service that satisfies the needs of the most exacting client/customer in a timely and cost effective manner. This is achieved by consistently conforming to agreed requirements, policies and procedures. The Company is fully aware of the requirements of ISO 9001: 2008 and ensures that the processes and procedures are in compliance with the standard.

It is the policy of the Company to provide and maintain safe and healthy working conditions, equipment and systems of work for all employees and such information, training and supervision as may be needed. In doing so the Company will endeavour to meet clients/customers' expectations and where possible, respond to unplanned requirements as quickly as possible.

This Policy Manual describes the Quality System in operation at Port Engineering Ltd. It explains the way in which the system is operated and defines those employees responsible for the performance of quality related tasks within the company.

The quality system is the means by which the Company supports its policy of providing to its customers a high quality product in accordance with all relevant standards and customer requirements and to provide these products on time.

It is Company policy to review the suitability of the quality system to ensure it reflects current operations, and where necessary to implement additional changes.

The Company will continue to review opportunities to improve systems and operations and implement additional controls to ensure there is continuous improvement.

The Managing Directors is the Management Representative. He is responsible for the implementation and operation of the quality system.

Steven Arnold
Managing Director
